Full Stack Engineer

Full-Stack Engineer with 4+ years of experience architecting scalable backend services, APIs, and full-stack web applications end-to-end. Experienced building AI-powered automations and intelligent workflows in production — including AI-driven performance validation, automatic task generation, and AI-generated reporting from project data — with Claude Code used daily as a core part of the engineering workflow. Skilled across NestJS, PostgreSQL, Prisma, React, Vue.js, TypeScript, and Tailwind CSS, with a strong product-oriented mindset and full ownership from architecture through deployment.

WORK EXPERIENCE

Finclusion AI

11/2025 – Present

Full Stack Engineer • Fulltime | Remote

Leading the end-to-end development of two core platforms: an agriculture and land intelligence system leveraging GIS mapping and spatial analytics, and a project management platform designed to streamline operational workflows. Responsible for architecting scalable frontend and backend solutions, designing RESTful APIs, managing relational databases, and translating complex datasets into intuitive user experiences.

- Led full-stack development for two production platforms, delivering 30+ user-facing features across agriculture intelligence and project management systems.
- Designed and developed scalable backend services using **NestJS**, **Prisma ORM**, and **PostgreSQL**, implementing modular architecture, authentication, authorization, and business logic.
- Developed interactive GIS mapping interfaces and spatial analytics dashboards, enabling users to visualize land data, agricultural insights, and geographic information in real time.
- Designed and optimized PostgreSQL database schemas, relationships, and queries using Prisma, improving data integrity and reducing query execution times.
- Improved overall application performance by **30–40%** through API optimization, database query tuning, efficient state management, lazy loading, and component optimization.
- Integrated third-party services and internal APIs to enable real-time data synchronization, reporting, notifications, and operational tracking.
- Collaborated closely with product managers, designers, and backend/frontend engineers to deliver end-to-end features from requirements gathering through deployment.
- Built AI-powered features into the project management platform, including automated performance validation, AI-driven task creation, and AI-generated presentations from live project data.
- Use Claude Code daily as a core part of the engineering workflow, spanning architecture, implementation, code review, and building internal automations.

Securecode Systems

05/2025 - 06/2026

Frontend Engineer (Contract)

Remote

- Launched a web-based trade management system, boosting operational efficiency by 70% within 3 months through streamlined tracking and reporting processes.
- Designed and built user-friendly dashboards that transformed complex data into actionable insights, fostering better collaboration across teams.
- Integrated administration features including role-based access control (RBAC), user management, multi-currency, and location settings, enhancing security and user experience.
- Ensured responsive UI and smooth navigation across complex modules using React, TypeScript, Tailwind CSS, Axios, Zustand, and REST APIs, leading to improved user satisfaction and engagement.

Simplified IQ

10/2022 - 02/2026

Frontend Developer

Remote

- Implemented scalable UI solutions with JavaScript frameworks, improving application performance and reliability by 25% through optimized code practices.
- Partnered closely with designers to ensure pixel-perfect implementation and user-friendliness.

- Executed comprehensive cross-browser testing within 2 months, ensuring a seamless user experience across devices by identifying and resolving compatibility issues.
- Wrote clean, maintainable code adhering to industry best practices and standards.
- Liaised with back-end developers for smooth integration of front-end components.

Dervac Institute

01/2023 - 08/2023

Web Development Tutor

Lagos, NGA

- Cultivated a positive learning environment where students felt comfortable asking questions and seeking help
- Prototyped and refined innovative teaching materials incorporating React and Bootstrap, resulting in 30% higher student engagement and enhanced understanding of complex web development concepts through practical application and interactive learning methods.
- Provided personalized instruction and mentorship to guide students toward mastery of web development concepts.
- Facilitated a collaborative learning environment to encourage knowledge-sharing and problem-solving.

RaydianSoft

04/2022 - 01/2023

Frontend Developer

Remote

- Worked with a team of 3 to build a responsive website using Vue3, which increased user engagement by 30% and improved accessibility for mobile users, resulting in increased site traffic and client satisfaction.
- Designed and developed key elements like landing page, authentication flow, and navigation system, improving user navigation and security
- Implemented mobile and tablet layouts for optimal user experience across all devices, increasing user satisfaction and retention

EDUCATION

Bachelor of Engineering, Petroleum Engineering

University of Lagos

10/2015 - 09/2021

PROJECTS

DFA TV

Haut tech

- Built and deployed a web application for video streaming that delivers faith-based and Islamic storytelling content to a global audience.
- Implemented a responsive, user-friendly interface with seamless video playback and navigation across devices.
- Integrated with backend APIs for content management, authentication, and media distribution
- Tech stack: Vue.js, TypeScript, Tailwind CSS, Axios, REST APIs

SKILLS

Technical Skills: AI/LLM Integration, Claude Code, Bootstrap, Git, JavaScript (ES6+), NestJS, Next.js, Node.js, PostgreSQL, Prisma ORM, Python, React, REST APIs, Tailwind CSS, TypeScript, Version Control Systems, Vue.js

Other Skills: Adaptability, Analytical skills, Communication, Creativity, Problem-solving, Teamwork
